

Knot Pusher

Order Code RA360

Knot pusher designed for tying and securing extra-corporeal knots

The closed-end design prevents the knot slipping from the pusher as it slips down. It can be used for ante-grade slip knots or standard surgical knots placed throw-by-throw, whether tied or extra-corporeally.

Features

- Suitable for monofilament and braided sutures
- Rounded and bevelled pushing surfaces to prevent suture cutting and degradation
- Most suture diameters
- Ease of sterilisation
- 4mm diameter, 45cm long
