

## MedGyn Silicone Pessaries

*Pessaries are an effective tool for the non-surgical treatment of a variety of gynecologic problems. Commonly used in management of pelvic support defects, pessaries are also used to treat stress urinary incontinence. MedGyn offers an extensive line of quality silicone pessaries and an easy to use ring and shaatz pessary fitting set.*

Ring without Support  
Pessary Fitting Set

Ring with Support  
Pessary Fitting Set

Shaatz Pessary  
Fitting Set

The Pessary Fitting Set is an ideal diagnostic tool to help the clinician determine the proper style and size of pessary for each patient. Stored in an attractive case, the set includes six popular Ring without support, Ring with support and Shaatz pessaries and an embossed cross-reference chart to use in selecting the appropriate pessary. One set may be used for multiple patients as the latex-free rings are autoclaveable.

The Ring Pessary, available with or without a supporting membrane, is primarily used for mild first-degree uterine prolapse or a cystocele.

The Knobbed Ring pessary, available with or without a support membrane, has the same indications as the Ring pessary and may also relieve stress urinary incontinence.

The Modified Cup Pessary is primarily used for mild first-degree uterine prolapse or a cystocele.

The Gellhorn Pessary with drain feature is used to relieve the symptoms of a cystocele or a rectocele as well as a second or third-degree uterine prolapse. The pessary stem with knob is easily folded for insertion and removal.

The Gellhorn Short Stem Pessary with drain feature is used to relieve the symptoms of a cystocele or a rectocele as well as a second or third-degree uterine prolapse. The Short-Stem may provide a better fit option for patients.

The Donut Pessary may be used to relieve the stress of a second or third-degree uterine prolapse, a cystocele or rectocele. This pessary, often used by post-menopausal women, is easily compressed for insertion and removal.

The Shaatz Pessary with drain may relieve the symptoms of a cystocele as well as a second or third-degree uterine prolapse. Its convex shape ensures a snug fit while the drainage holes permit easy removal.

The Cube Pessary, available with or without drains, may be used to relieve the symptoms of a cystocele or a rectocele as well as a second or third-degree uterine prolapse.

The Cup Pessary, available with a support membrane, is used for a first or a mild second-degree uterine prolapse.

The Dish pessary, available with a supporting membrane, is used to relieve the stress of a second or third-degree uterine prolapse, a cystocele or rectocele. This pessary may also relieve stress urinary incontinence.

The Oval Pessary, available with a supporting membrane, is commonly used for a mild first-degree uterine prolapse or a cystocele. This pessary's shape inhibits its rotation in women with a history of vaginal surgery.

The Marland Pessary is available with or without support membrane, is used to relieve the symptoms of a second or third-degree uterine prolapse, a cystocele or rectocele.

The Hodge Pessary is available with or without support membrane, commonly used for a first or mild second-degree uterine prolapse and may also relieve a cystocele. A Hodge Pessary with support is also effective in the prevention of exercise incontinence.
